SUMMARY

I am a Software Engineer with over 2 years of experience building and maintaining web applications. I enjoy working across the whole stack, from building smooth frontends in React to handling backend logic in Go and PHP and managing cloud infrastructure on Azure. I'm a quick learner who thrives in fast-paced teams, and I'm always looking for ways to make code more maintainable and systems more efficient.

EXPERIENCE

Full-stack Developer | Kitameraki (Yogyakarta, Indonesia)

July 2024 – Present

- Part of the team building and maintaining Teamwork, a suite of tools for CRM, Billing, ATS, and ticketing integrated directly into Microsoft Teams.
- Managed cloud infrastructure using Azure Bicep, making sure our deployments were consistent and easy to replicate across different environments.
- Developed new features for both the frontend and backend, while keeping a close eye on API performance and system reliability.
- Built a custom AI-powered localization tool to automate JSON translations, which saved the team a lot of manual effort.
- Actively participated in technical discussions and code reviews to keep our system design and code quality high.

Junior Software Engineer | Refactory (Yogyakarta, Indonesia)

February 2023 – May 2024

- Started with an intensive probation and pairing program, where I worked with senior engineers to get up to speed on complex production codebases.
- Created a library of reusable UI components using React, TypeScript, and Storybook, which helped the team build features faster and more consistently.
- Focused on making our code easier to read and maintain through regular refactoring.
- Set up unit tests and QA automation within our CI pipelines to catch bugs early and make deployments more stable.
- Collaborated daily with cross-functional teams to debug issues and deliver features that were ready for production.

Frontend Developer Intern | Jiwalu Kreasi Studio (Karawang, Indonesia)

September – December 2022

- Built responsive web interfaces using AngularJS and Tailwind CSS, turning Figma designs into functional code.
- Handled cross-browser testing to make sure everything worked perfectly across different devices.

Full Stack Web Developer Intern | Perum PERURI (Karawang, Indonesia)

March – August 2022

- Developed internal web tools using Laravel to help automate HR and admin tasks.
- Built a management system for official documents (SKEP) that included automated PDF generation.
- Planned out technical implementations by creating flowcharts and ERD diagrams to match business needs.

FREELANCE PROJECTS

Web Engineer & SEO Specialist | Exclolab (Limitless)

2025 – Present

- **SEO Overhaul:** Successfully boosted the Ahrefs SEO score from **24 to 90+** by migrating the company profile from React to **Next.js**.
- **UI Modernization:** Swapped out the old UI library for **Shadcn-ui**, resulting in a much faster, cleaner user experience.
- **Product Launches:** Built landing pages for **Sealead AI** and **Madawa** using **PHP Livewire and Flux UI**, focusing on high performance and search visibility.

Fullstack Developer | Investasi Kaya

2024

- **Solo Development:** Built the entire web presence from scratch, including a **Next.js** company profile and a **Supabase** backend.
- **Mobile & Backend:** Handled a 3-month contract to maintain and add features to their mobile app (**React Native**) and backend (**Java Spring Boot**).

TECHNICAL SKILLS

- Languages: TypeScript, Go, PHP, Java, Python, C#, Dart.
- Frontend: React, Next.js, Vue, AngularJS, Tailwind CSS, Bootstrap, Storybook.
- Backend & DB: Go, Laravel, PostgreSQL, MySQL, Supabase, REST APIs.
- Cloud & Tools: Azure, Azure Bicep, CI/CD, Playwright, Git, Figma, Agile/Scrum.

EDUCATION

Bachelor of Computer Science | Universitas Buana Perjuangan Karawang

2018 - 2022

- GPA: 3.57 / 4.00
- Thesis: Built a mobile English–Indonesian translator app using OCR and Text-to-Speech.
